

PREDICTIONS FOR 2009

In the nineties we were blessed with extreme well astrological constellations. It was the time of the birth of indigo kids. All the outer planets were outgoing, even Saturn was. The last 15 years no harsh constellation we have met except for Pluto opposition Saturn in 2001 and 2002. This appeared to be a small economic recession, easy to overcome.

Now however, as the cycles of time evolve, we will meet a few harsh opposition and squares which will shake the world. In September 2008 it started off with the opposition of Uranus and Saturn. This is the first abode of the coming events in 2012, by the Maya's known as the end of the 500 year era of the 13 hells. This opposition will be followed up by the square of Saturn and Pluto in 2010 and of Uranus and Pluto in 2011, the year the Maya's speak about as the acceleration of world events.

In September 2008 the whole world realized the credit crisis was damn serious and not to be solved with some easy re-regulations. Uranus, the cosmic messenger, is opposing the earthly rule of Saturn. We all can see what is happening on the economic plane, the domain of Saturn. The main players on the economic and financial field were violating cosmic laws. That is the message of this opposition. This opposition is the struggle to dethrone them (or to change their minds).

During the first exact Uranus - Saturn opposition on 4 November 2008 Obama got elected as a manifestation of Uranus. The second exact opposition will be on 31 January 2009 and Obama will present his first plans to solve the problems. Economically it is getting worst rapidly but at least there are some plans.

The hopes will grow in the following months, since the Uranus - Saturn opposition is fading and will disappear in April for three and a half months. The economic downfall seems to slow down or even restore a bit. Moreover Jupiter enters Aquarius in January so the whole world will philosophize about a better world. In March Jupiter will hit

Neptune in conjunction and a wave of beautiful philosophies about the world and politics (Aquarius is about politics) will be born. So although a lot of people will experience economic problems a wave of spirituality is flowing over the world. If you yourself are not that materialistic this period lasting till January 2010 can be beautiful and inspiring.

What really will determine the course of events is the result of an assault on Obama. Born on the 4th of August 1961 the transit of Neptune in his first house will have an exact opposition with his Uranus on 21 March 2009. Some idiot (Neptune as an illusion) will try to harm his body (1st house). Moreover on March 12 transit Uranus (also in the 1st house) will oppose his Mars. You can almost be sure some accident will happen in March or April. I myself was a victim of sudden attack in January 1997 when transit Neptune was exactly opposing my Uranus and transit Uranus was beginning an opposition with my Mars. I survived it. For Obama transit Mars will oppose his Uranus on April 16 on top of that. I deeply think (=hope) he will survive it. I feel it. In April, May and June the stars show a relaxation and not a mass hysteria. And why otherwise should Nostramus mention Obama?

Century V.41

Nay souz les umbres & iournee nocture
Sera en regne & bonté souueraine:
Fera renaistre son sang de l'antique vrne,
Renouuellant siecle d'or pour l'aerain.

Born under the shadow of a nocturnal day
He will be sovereign in his rule and his goodness:
He will revive his blood of the ancient urn
Renewing the golden century in an airy one.

The assault is predestined, the result is not. If Obama listens to his inner guides he feels where to go and where not to go thus avoiding being damaged. I remember the day I was assaulted. That morning all angels were talking to me not go to that place. Out of duty I went. I was con-

stantly thinking of going back home. My intuition told me but I did not listen. That afternoon it happened.

From April on for 3.5 months Saturn will be out of his opposition with Uranus and a relaxation will take place. But it will not last. In the middle of July the opposition between Saturn and Uranus sets in for the last time and we will experience the dirty tail of the credit crisis. It will reach its peak, its last exact opposition, on the 25th of September. This means world wide big political disagreements and even fights. Sabotage and distrust (Saturn) are again laming every solution (Uranus).

In November Saturn will walk out of this opposition. One might think: "Is this the end of the misery?" No. It will only get worse when Saturn starts squaring Pluto in October 2009. Oppositions and squares between Pluto and Saturn always mean economic recession or crisis. Since this economic downfall comes after the credit crisis, the recession will be a depression the world has not seen yet since 1931. Not only the sky is the limit, the bottom appears to have no limits either. In 1931 Saturn was opposing Pluto and squaring Uranus. It is a bit alike.

Saturn first exact square with Pluto is on 15 November 2009. Another black Monday on Wall Street. Total financial breakdown? In the following year it will look like it. The square between Saturn and Pluto will last until October 2010. In May 2011 Uranus starts squaring Pluto for six years what will trigger the big transition the world needs.
